ARGOTEC PROMOTES DAVID COLLETTE TO VICE PRESIDENT OF MANUFACTURING & TECHNOLOGY

GREENFIELD, MA, August 26, 2005 — Bruce R. Wilby, president and chief operating officer of Argotec, Inc., headquartered in Greenfield, Massachusetts, today announced the promotion of David A. Collette to vice president of manufacturing & technology. “Dave has done an outstanding job as technical director these last three years,” said Mr. Wilby. “We feel that having manufacturing and technology in one group under his leadership will help position Argotec to maintain the steady growth we are experiencing.”

In this newly created position, Mr. Collette will have responsibility for the company’s two manufacturing plants, plus the process engineering, quality and materials departments. He will report to Bruce Wilby.

Prior to joining Argotec in 2002 as technical director responsible for the company’s research and development activities, Mr. Collette was employed by JPS Elastomerics Corp. as group technical director. He received his bachelor of science degree in chemical engineering from Worcester Polytechnic Institute and currently resides in South Hadley, Massachusetts with his wife and four children.

Founded in 1988, Argotec manufactures custom-engineered polyurethane film and sheet for a wide variety of critical applications using flat-die, blown-film and cast-on-carrier extrusion technologies.
